Heat Wave

I was outside one day at our farm when I saw a big cloud of yellow air coming across the sky. A flock of geese flew into **(the)** cloud. They came out plucked, stuffed **(and)** cooked!

The Heat Wave had hit **(our)** farm. Our flowers pulled up their **(roots)** and walked under the porch, looking **(for)** shade. The corn that was planted **(in)** the fields got so hot that **(it)** started to pop. Our cows jumped **(around)** on the hot ground so much **(that)** their milk turned into butter.

We **(needed)** to fight the Heat Wave. We **(mixed)** flour, yeast and water together outside. **(The)** dough started baking in the heat. **(A)** flock of crows smelled the baking **(bread)** and flew over. Their flapping wings **(cooled)** us off for a minute, but **(the)** birds didn't keep moving. They **(landed)** there and ate the bread. And **(the)** temperature went right back up.

I **(had)** another idea. We planted lettuce seeds, **(which)** started to grow right away. The **(more)** the lettuce grew, the cooler the **(air)** got. The Heat Wave put up **(a)** fight, but the lettuce won. The **(Heat)** Wave finally disappeared. So, I saved **(the)** farm by planting lettuce. How did **(lettuce)** cool the air? Well, it wasn't just any kind of lettuce – it **(was)** iceberg lettuce!

Heat Wave

I was outside one day at our farm when I saw a big cloud of yellow air coming across the sky. A flock of geese flew into **(though, carelessly, the)** cloud. They came out plucked, stuffed **(growth, disapprove, and)** cooked!

The Heat Wave had hit **(our, roof, compete)** farm. Our flowers pulled up their **(doubtful, besides, roots)** and walked under the porch, looking **(colourful, prison, for)** shade. The corn that was planted **(different, slow, in)** the fields got so hot that **(greet, gentle, it)** started to pop. Our cows jumped **(window, purpose, around)** on the hot ground so much **(that, arch, busily)** their milk turned into butter.

We **(needed, examine, merrily)** to fight the Heat Wave. We **(letter, mixed, brightly)** flour, yeast and water together outside. **(Wore, The, Approval)** dough started baking in the heat. **(A, Condemned, Bed)** flock of crows smelled the baking **(cooing, woman, bread)** and flew over. Their flapping wings **(excuse, outstanding, cooled)** us off for a minute, but **(strengthen, the, unripe)** birds didn't keep moving. They **(plus, landed, drive)** there and ate the bread. And **(super, tree, the)** temperature went right back up.

I **(but, had, alert)** another idea. We planted lettuce seeds, **(which, wooden, lay)** started to grow right away. The **(recognize, more, shrill)** the lettuce grew, the cooler the **(air, dark, paste)** got. The Heat Wave put up **(a, warn, damage)** fight, but the lettuce won. The **(spent, fragile, Heat)** Wave finally disappeared. So, I saved **(the, icy, cushion)** farm by planting lettuce. How did **(lettuce, friend, instrument)** cool the air? Well, it wasn't **(t, size, hid)** just any kind of lettuce – it **(or, was, him)** iceberg lettuce!
